

**ROCKINGHAM KWINANA DISTRICT HOSPITAL**  
 Nurse Practitioner – Emergency Services  
**CLINICAL PRACTICE GUIDELINE**  
**MINOR HEAD INJURY**

**No. 4**

Scope		Outcomes
<b>Nurse Practitioner</b>	Minor head injury <ul style="list-style-type: none"> <li>• LOC &lt; 2 Minutes</li> <li>• GCS 15</li> </ul>	Identify patients suitable for NP CPG
<b>Medical Practitioner +/- Nurse Practitioner</b>	<ul style="list-style-type: none"> <li>• Underlying medical pathology / complex patient</li> <li>• Neurological deficit</li> <li>• Multiple injuries</li> <li>• Altered conscious state including effects of drugs/ alcohol</li> <li>• History consistent with collapse/fitting</li> <li>• GCS ≤14</li> <li>• Clinical evidence of base of skull #</li> <li>• Seizure (post injury or history of epilepsy)</li> <li>• On anticoagulants:               <ul style="list-style-type: none"> <li>– clopidogrel</li> <li>– warfarin</li> </ul> </li> <li>• Bleeding diathesis eg. haemophilia, von Willebrands disease, severe liver disease</li> <li>• Compensable status - MVIT/ WCA (all assessment and documentation must be completed by the attending medical officer)</li> </ul>	Identify patients not suitable for NP CPG and redirect to usual ED care +/- NP in team.
Assessment & intervention		
<b>History</b>	<ul style="list-style-type: none"> <li>• MIST: Mechanism; Injuries sustained; Signs – vitals; Treatment given / pre hospital management / time</li> <li>• Amnesia – pre / post injury</li> <li>• Vomiting</li> <li>• Risk factors</li> <li>• Allergies / Immunisation status</li> <li>• Relevant past medical history / medication use</li> <li>• Last food/fluids</li> </ul>	Identify patients not suitable for NP CPG → exit CPG
<b>Focused clinical assessment</b>	<ul style="list-style-type: none"> <li>• Loss or alteration in conscious state – duration</li> <li>• Seizure activity– duration, description</li> <li>• Condition since injury – nausea, vomiting, amnesic</li> <li>• Pupil size, equality and reactivity and look for other focal signs</li> <li>• Perform secondary survey including cervical spine for central bony tenderness</li> <li>• Head, neck and scalp examination</li> <li>• Ear / nose</li> <li>• Document GCS <sup>[1]</sup></li> <li>• Cranial nerve assessment</li> <li>• Ocular movements</li> <li>• Motor function - Tone / power / plantar reflexes</li> <li>• Gait / tandem gait</li> <li>• Past-pointing</li> <li>• Romberg's sign</li> <li>• Canadian CT Head Rules <sup>[2, 3]</sup> – See Appendix - D/W ED Consultant / SMO if criteria met</li> <li>• Open wound see Open Wound CPG</li> </ul>	Determine spread/ distribution of problem identify patients for alternative CPG or exit CPG  Abnormality / need for CT identified - refer to ED Consultant/ SMO. → exit CPG
<b>Pain Assessment</b>	<ul style="list-style-type: none"> <li>• Pain scale</li> </ul>	Determine need for and type of analgesia

**ROCKINGHAM KWINANA DISTRICT HOSPITAL**

**No. 4**

<b>Analgesia / First Aid Management</b>	<ul style="list-style-type: none"> <li>• First Aid - Rest</li> <li>• Administration of analgesia ( see medications )</li> </ul>	Reduction / relief of pain. Minimise or prevention of complications
<b>Investigations</b>		
<b>Imaging</b>	<ul style="list-style-type: none"> <li>• No XR imaging routinely required in minor head injury.</li> </ul> <p>NOTE: If Canadian CT Head Rules identify need for CT refer to ED Consultant / SMO.</p>	
<b>Pathology</b>	Not routinely required in minimal to minor head injury	
<b>Interpretation of Results and management Decisions</b>		
<b>Minor head injury</b> [1]	<ul style="list-style-type: none"> <li>• NP review with view to discharge into care of responsible adult.</li> <li>• Pt education /health promotion</li> <li>• Medication prescribed as per formulary</li> <li>• Follow up appointment with LMO</li> <li>• Appropriate wound dressing if required</li> </ul> <p>NOTE:</p> <ul style="list-style-type: none"> <li>• As well as above, all information is to be provided and explained to a responsible adult</li> <li>• All patients with reported LOC are to be offered 4/24 observation (since time of injury) and document.</li> </ul>	Ensure patient is safe for discharge home, and the patient (and responsible adult) understands problem, treatment and follow up care.
<b>Associated Care</b>	<ul style="list-style-type: none"> <li>• Consider ECG</li> </ul>	
<b>Patient Education / Discharge Information (Verbal &amp; Written)</b>		
<b>When to return instructions</b>	<p>Instructions to report immediately if the following problems [1]</p> <ul style="list-style-type: none"> <li>• Persistent vomiting (more than twice)</li> <li>• Drowsiness – unable to be woken up completely</li> <li>• Confusion, disorientation, slurred speech</li> <li>• Increased headache (not relieved by standard dose paracetamol)</li> <li>• Localised weakness, altered sensation or coordination</li> <li>• Blurred or changes in vision</li> <li>• Seizures</li> <li>• Neck stiffness</li> </ul>	Ensure patient safe to be discharged home, and patient (and responsible adult) understand treatment, follow up and when to return for review.
<b>Follow-up Appointments</b>	<ul style="list-style-type: none"> <li>• Verbal / written instructions from NP</li> <li>• ED written patient information <ul style="list-style-type: none"> <li>○ WADH Head Injury Advice Sheet for Adults / Children</li> </ul> </li> <li>• Written instructions for LMO via Communik8</li> </ul>	Provide patient with all relevant information / documentation to ensure ongoing care / management.

<b>Medication Instructions</b>	<ul style="list-style-type: none"> <li>• Verbal / written instructions from NP</li> <li>• Written information as per Hospital Pharmacy on medications dispensed.</li> </ul>	
<b>Other Referrals</b>	Consider referrals for specific patient problems as required: <ul style="list-style-type: none"> <li>- Social Work</li> <li>- Physiotherapy</li> <li>- Drug and Alcohol Counsellor</li> <li>- Aboriginal Liaison Officer</li> <li>- ED Mental Health Liaison Nurse</li> <li>- Allied health</li> <li>- Interpreter</li> <li>- Discharge coordinator etc</li> </ul>	
<b>Certificates</b>	<ul style="list-style-type: none"> <li>• Absence from work certificates</li> <li>• Certificate of attendance</li> </ul>	
<b>Letters</b>	<ul style="list-style-type: none"> <li>• LMO letter via Kommunik8</li> </ul>	
<b>Medication</b>		
All medication will be stored, labelled and dispensed in accordance with hospital policy and relevant legislation <sup>[4]</sup>		
<b>Simple analgesia</b> [5] <b>S2</b> <b>Mild</b>	On initial assessment of mild pain:  <u>ADULTS:</u> <b>Paracetamol:</b> PO / PR: - 500 mg – 1 gram 4 - 6 hourly, not to exceed 4 grams in 24 hrs IV infusion: - 1 gram infused over 15 minutes. Not to exceed 4 doses in 24 hrs. Use for mild – mod pain or fever where PO/PR not tolerated, or patient fasting/ vomiting  OR <b>Paracetamol 500mg/Codeine 8mg</b> per tablet - 1 or 2 tablets PO 4-6 hourly, not to exceed 8 tablets in 24 hrs  <u>CHILDREN:</u> <b>Paracetamol:</b> PO / PR: - 15mg/kg PO 4 hourly up to 4 times /day. Not to exceed 4 doses in 24 hours IV infusion: - >6 months 15 mg/kg/dose infused over 15 minutes. Not to exceed 4 doses in 24 hrs. Use for mild – mod pain or fever where PO/PR not tolerated, or patient fasting/ vomiting.  *Total daily maximum of paracetamol 90 mg/kg/24 hrs for the first 48 hours then 60 mg/kg/24 hrs.  <b>FAILURE TO CONTROL MILD AND/OR INITIAL ASSESSMENT OF MODERATE / SEVERE PAIN – Discuss further management with ED Consultant / SMO</b>	Patients given analgesia appropriate to allergies, current medications and past medical history  Analgesia requirements determined by ongoing assessment of pain and adequate analgesia provided  Excessive pain refer to ED Consultant / SMO

**Appendices**

**CANADIAN HEAD RULES** <sup>[3]</sup>

**CT Head Rule is only required for patients with minor head injuries with any one of the following:**

High risk (for neurological intervention)

- GCS score < 15 at 2 hours after injury
- Suspected open or depressed skull fracture
- Any sign of basal skull fracture (haemotympanum, 'raccoon' eyes, cerebrospinal fluid otorrhoea, Battle's sign)
- Vomiting > two episodes
- Age ≥ 65 years

Medium risk (for brain injury on CT)

- Amnesia before impact > 30 min
- Dangerous mechanism (Pedestrian struck by motor vehicle, occupant ejected from motor vehicle, fall from height > 1 metre or 5 stairs)
